Bob Butler/attach.

TO : Don E. Roush - St. Louis

I am requesting our refinery to send a five-gallon can of our 55/60 Vis. Neutral Oil to the attention of R. W. Weiss for his inspection as a possible comparable product to Mobiltherm Light. This product is from the same crude petroleum stock from which the Liontherm 600 was manufactured. I am attaching specifications and I believe you will find them comparable to those of Mobiltherm Light.

I would like to point out that we have not used this material as a Heat Transfer Oil; therefore, I do not have any other information other than the attached physical properties.

Should you need other samples, or any other information, please let me hear from you.
