Mr. Gus McGill
Monsanto Company
6251 Paramount Boulevard
Long Beach, California 90801

Dear Mr. McGill:

Through Earl Potter I have learned of the fine effort extended by you and Mr. Letarte in getting the 40 drums of Therminol 66 drummed and shipped on Labor Day for Harvey Aluminum of Washington. Your action will surely allow them to get back into production at least a full day in advance of our earlier estimates.

The customer accidentally contaminated his Therminol 66 system with water and had to remove the entire charge.

The efforts of you, Mr. Letarte and Earl Potter's group are greatly appreciated.

Sincerely,

James J. Roder
Product Supervisor
Heat Transfer Fluids
