Emory Kimball, who joins us as Group Superintendent of Product Group C, comes to the Krummrich Plant following production assignments at Queeny, Luling, and Delaware River.

Because of his specialized knowledge, Sil Lutkewitte will continue as specialist in the chloro-alkali area. Reporting to Kimball in this capacity, Sil will handle the Chlorine Department during its modifications over the next year.

Gordon Geers will be moved to Maintenance as Superintendent of Utilities, reporting to C. N. Deubner. In order to utilize fully Gordon's experience and expertise in this area, he will be responsible for the entire utilities effort, including operation, maintenance, engineering and planning, to assure prompt and complete compliance with all state and federal statutes regarding operation and control.

* * *

- The production group superintendent will function as a "quarterback" for the product team made up of himself, the maintenance group supervisor, group TSD superintendent, and group accountant.
- There are no significant organizational effects on the other plant groups.
- Responsibility for changing to the new organization as soon as possible rests with each group.
