Mr Barker
Clegorn
H+R

Date February 8, 1949

To Mr. J. F. Reeves Reference

At Anniston, Alabama Subject Westinghouse Electric Corporation
Cleveland, Ohio

The subject concern is now operating its plant at Cleveland for the manufacture of capacitors and from time to time will be ordering Aroclor 1254 for shipment to that point. For the time being, orders will be for L.C.L. quantities. In this connection they have asked that we follow the same procedure in sending analysis certificate with each shipment just as we have been doing for some time in the case of shipments to their East Pittsburgh plant. Therefore, will you please mark your records to show that in the future whenever a shipment of Aroclor 1254 is made to Westinghouse at Cleveland, an analysis certificate in duplicate is to be mailed direct to the following address on the day shipment goes forward:

(3) Mr. J. B. Staruch
Purchasing Department
Westinghouse Electric Corp. 2 copies
1216 West 58th Street
Cleveland 1, Ohio.

We will also arrange to have the orders we placed with Anniston carry a note to the effect that analysis certificate is to be furnished to customer.
