gypsum lathe, and then they had wood lathes.

Q So that is what would be used to actually adhere the brown coat to, the first two or three coats of the plaster that you would put on?

A Yes.

Q Is it true, sir, that the plaster that you and Mr. Vandergucht would use would be mixed in the middle of the room?

A Yes, it would.

Q And you would use something called a mortar box to mix that in?

A Yes, ma'am.

Q And those were pretty big, four feet by seven feet and one foot deep?

A Yes.

Q The laborers would come in with about 100-pound bag of plaster and dump it in the mortar box?

A Yes.

Q That process would create a lot of dust?

A Yes.

Q Mr. Vandergucht would be around when the
