Mr. F. L. Raab, Manager
Materials Engineering
Distribution Transformer Dept.
Building 8, Room 303
GENERAL ELECTRIC COMPANY
100 Woodlawn Avenue
Pittsfield, Massachusetts

Dear Ed:

Pursuant to yours of July 7, we have arranged to send to your attention without charge, 5 gallons each of dodecyl benzene Nos. 122 and 225.

The "soft" terminology as indicated in my letter of July 1, refers to the biodegradable type dodecyl benzene. Accordingly, the "hard" type is merely the kind that the organisms lose their teeth on, and as we have not been able to provide sufficient quantities of false dentures, the ultimate result has been great columns of foam erupting from the kitchen sink, flowing across the back porch. If you happen to be a foam collector, you had better utilize your vacation to acquire a stock, as this is destined to be a scarce item.

Thank you for the invitation, and I will be glad to be on hand at your office early Tuesday morning, July 28.

I would appreciate it if you would please call the Wendall Sherwood and reserve a room for late arrival Monday evening, July 27.

I would like very much to have you and your family as guests for dinner Tuesday evening. Or if this does not suit the family, please make any other arrangements for Tuesday evening.

Looking forward to seeing you.

Best regards.

Yours very truly,

P. G. Benignus

ss

PS to G. Randall Graham

GE, Pittsfield, asked me to call to meet with Ed Raab&the manager of marketing and others to discuss askarel transformers worldwide. Plan to leave St. Louis Monday, July 27 at 12:05 noon, and arrive at Albany on Mohawk 135 at 4:58 pm. If this suits your plans and you can join me, please meet me at the airport; otherwise I will rent a car and drive over to Pittsfield as I will be flying back to St. Louis from Albany later in the week. I have asked for a reservation at the Wendall-Sherwood. If you elect to join me, you will probably want to get a room at this same hotel.

P. G. B.
