quote, Asbestos Health Question Perplexes Expert, closed quote, you say that in addition you have listed all the articles received from Mr. Weaver which are related to the asbestos problem. What did you mean by the asbestos problem in December of 1973?

MR. FRIESTEDT: Objection.

A Well, this was the year after OSHA was starting to investigate asbestos as a hazardous material and they were coming out with recommendations. That's the problem, we are going to be regulated on asbestos exposures.

Q And you attach a listing of several articles to Exhibit G; did you prepare this list?

A I don't know whether Ike prepared or I prepared it to tell you the truth.

Q Can you just stop and think for a moment if anything there refreshes your memory?

A I say, "In addition, I have listed all the articles received from Mr. Weaver which are related to asbestos" -- so I must have gone and done this.

Q Would these have been articles that you had at the Institute?

A Most likely Ike sent them to me.

Q And then you would have had them and keep them?
