Page (2)

other possibility is
eventual disposal
of products that have
a color in them. —

acknowledge — — Monsanto has expressed concern
& have been cooperating with private, university
& governmental laboratories
— interest in finding of PCB
along with the DDT pesticide
residues —
Conclusion still puzzling
in a new sense.
— in some analysis — the
PCB spectrum stand out
in our findings —
(report seems inconclusive)
— since the article concerning Dr. K in Feb
there have be other indications of the PCBs
— ~~the conclusion of these scientists~~
~~and others involved subsequently~~

show up along with pesticide
residues in other parts of the country
— as yet sources not pin pointed. —

NOT USED

- Thus any conclusions
of the scientists
as to sources are puzzling

page

acknowledge yes
qualified scientists
~~[illegible]~~ work OK
Pt. ~~[illegible]~~ work OK
- most scientists are not
willing to ~~implicate~~ ~~[illegible]~~
indite PCB ~~[illegible]~~
~~[illegible]~~
- ~~puzzling~~ -
- still major question
in mind of qualified
scientists as to possible
sources

Page 3 last ¶

- ~~on going~~ interim reports on chronic toxicity studies confirm that these materials are not highly toxic to mammals -

- quote 90-day studies on rats and normal lab species - indicate diets of up to 100 ppm have ~~no~~ or not indicated no adverse effect. -
