MR. IGNATOWSKI: I don't think yours works -- oh, yes, it does.

November 15, 1971, Ford Number 97.

THE COURT: It will be admitted in evidence.

(Whereupon, Plaintiffs' Exhibit Number Ford 97 was received into evidence.)

MR. IGNATOWSKI: Since our last study conducted in August 1970, the air collection equipment has been exhausted to the outside of the plant.

I am going to move down to the third paragraph.

The results of the air samples taken in the mixing room indicate a continuing dust problem. Little change can be noted in the operation of this area.

For example, automatic silos for asbestos are not reliable, necessitating the adding of asbestos by hand. Also, silo ductwork leaks asbestos fibers and compressed air is used for cleaning purposes.

It should be noted that the Occupational
