It has been pointed out by Mr. John Eck that the distribution of comprehensive reports dealing with potential or existing pollution problems has been excessive and should be limited to a need-to-know basis. To limit the accessibility of this information, we are requesting that all copies of detailed investigations concerning Anniston be returned. These include reports from Dr. Denzel Ferguson (1 report), Drs. Gunning and Suttkus (3 reports) and the report from the Kem-Tech air pollution survey.

Copies of these reports will be retained by P. B. Hodges in the General Offices for your use. The Anniston Plant will maintain one duplicate file of the reports to insure their availability.

Your cooperation in this matter is appreciated.
