

1 scopolamine patch, a medication that is applied as a
2 patch.

3 Typically it is a little thing that you put
4 behind the ear that is used for a number of
5 conditions. And in this condition it would be used to
6 dry up the secretion to make it easier for him to
7 breathe so that he wouldn't have to try to clear all
8 of the respiratory secretions.

9 That would dry them up a little bit to make
10 him more comfortable.

11 Q We heard from Mr. Grewe from his videotape
12 that sometime around the time in September of 1993 he
13 had inserted into his left hip something called a
14 C-a-d-d, pump, a pump for narcotics?

15 A A Cadd pump.

16 Q Cadd pump.

17 What is a Cadd pump?

18 A Cadd pump is a portable infusion pump, and
19 the idea here is to deliver, continuously, pain
20 medication to control his pain.

21 It is a portable infusion pump to try to
