AROCLOR WITHDRAWAL/
ESSEX CHEMICAL CORPORATION

AF

J. E. Springgate
B3NA

I have attached a copy of a letter from Essex Chemical Corporation which is essentially self-explanatory. They use Aroclor 6050 ~~in~~ a polysulfide sealant which they sell to Boeing under a defense contract. They need an additional 10,000 pounds over and above their allocated volume of 15,000 pounds.

I am having J. S. Bush in our Washington Office check on the nature/validity of Essex's priority number. So far, all I know is that this number has higher rating than the priority ratings given to us by Arguesso (lost wax casting) and that, by law, if we have material available, the holders of a government priority are supposed to receive their requirements.

Recommendation

Based on their government priority, I recommend that we sell Essex an additional 10,000 pounds of Aroclor 6050.
