CAREY ASBESTOS FELT

In answer to my letter of December 2, 1971, we received a phone call from Mr. Larimer. He indicated they were moving ahead with a plant trial to produce an asbestos raw felt comparable to the GAF felt we are now using. He promised to send us a few sheets from this run. We expect to test the samples in our laboratory to help decide on whether we should try a roll or two in one of our plants.

The new Carey raw asbestos felt was quoted at $205.00 per ton, frt. equalized to Waukegan. GAF felt delivered to Martinez costs us $214.00 per ton plus $32.80 freight from Erie, Pa.
