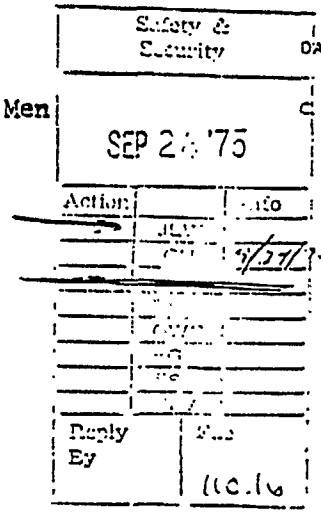
INTEROFFICE CORRESPONDENCE



DATE September 22, 1975

TO All N.A.D. Safety Men

C.C. L. A. Foy - Dallas
R. H. Murray - 15 Fl.
R. C. Randle - 34 Fl.
W. J. Selfridge, Jr. - 15 Fl.
L. G. Vaile - 21 Fl.

E. R. Managers

OSHA STANDARD 1910.93(a) ASBESTOS

Mobil's position relative to the storage, handling and use of asbestos and asbestos containing materials has been forwarded to field locations by N.A.D. Safety including the captioned standard via Mobil Occupational & Health Bulletin No. 35. Correspondence to date, however, mainly related to asbestos/ asbestos containing materials used for insulation purposes.

There are asbestos containing materials of a preformed type, usually bonded or woven, which under law will require confirmative tests relative to degree of exposure presented in their handling and use. Therefore, as a further activity, we plan to have "Air Tests" conducted to determine this degree of exposure.

Bonded or woven materials are not limited to, but normally relate to the following:

- woven asbestos covered thermovinyl wires
- solid sheet asbestos gaskets
- metal asbestos sandwich gaskets
- woven fabric asbestos gaskets
- spiral wound asbestos packet gaskets
- asbestos gloves, hoods, etc.
- asbestos welding blankets
- asbestos fire protection suits
- graphite impregnated woven asbestos packing for pumps
- bonded transite pipe
- bonded asbestos siding and shingles

05483

447255

"Air Test" data may be available from the supplier or manufacturer of a given product, which should be suitable for control measures. However, where it is not available, we will request Industrial Hygiene to perform relevant tests so that a determination can be made concerning each particular product. We, therefore, request that you complete the attached form and return to R. H. Wright no later than October 9, 1975.

The required information on this form is a listing of all bonded or woven asbestos containing materials used in your operations with respective name and address of the supplier or manufacturer.

Please contact the writer for any guidance required.

We are still waiting for your response to our September 22, 1975 memorandum and questionnaire listing all bonded or woven asbestos containing materials used in your operations with respective name and address of the supplier or manufacturer which was due October 9, 1975.

As we are planning to coordinate tests with other Mobil Oil Corporation Divisions, it is of the upmost importance that we receive your input as soon as possible.

Please advise.

R. H. Wright
