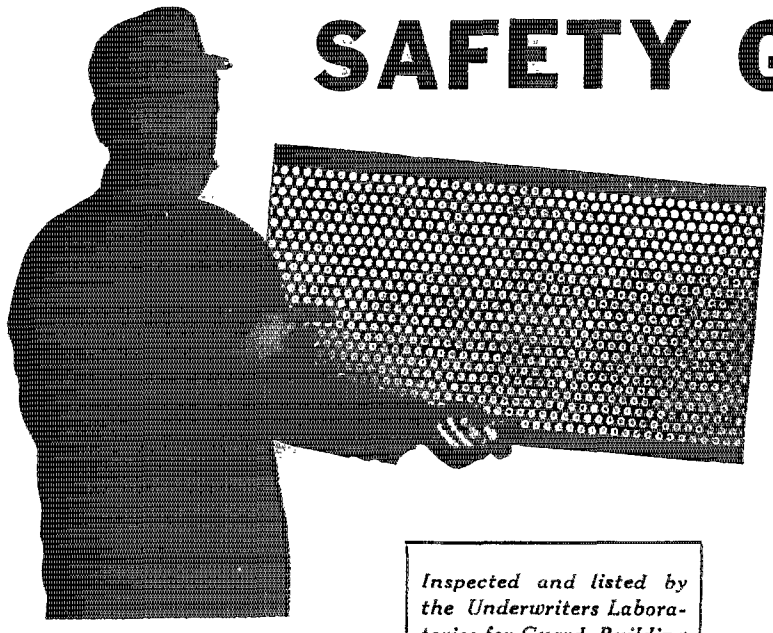
SAFETY GUARDS



Inspected and listed by the Underwriters Laboratories for Guard Building

MAKE them really safe by using perforated Steel Sheets for covering fabric. Perforated Steel has a smooth surface with no burr edges to scratch the hands. This is an important item to consider, for a guard that will scratch or cut the hands is not an asset but a menace. In making a guard make it really safe. Write for booklet.

THE HARRINGTON & KING PERFORATING CO.

5645 Fillmore St., Chicago -:- 114 Liberty St., New York

THE accountant never lived who could accurately figure the real cost of an accident. For who can measure human misery, the anguish of wife and children, the fear of permanent injury or death?

That is the PLUS of accident COST . . . and only the Recording Angel writes the staggering total.

Stonehouse Accident Prevention Signs reduce the "Cost-Plus" of accidents by teaching men to work *safely!*
