

Weirton Steel Company
Order M-2896

Pittsburgh

September 15, 1960

Mr. J. C. Kliefoth
Chicago Office

Dear John:

This is in reply to your letter of September 12, 1960 relative to the shipment of 1200# of Decrete 40 for the above job.

The total requirements of Decrete for this installation is 2900 lbs. Our Engineering Department errored in their original take-off and told me to order only 1700 lbs., however, at a later re-check of the requirements they discovered their error and had me order this additional 1200 lbs. Therefore the charges for this additional insulation should be applied to the above job.

~~installation~~ insulation The reason we placed two (2) purchase orders for was due to the original order being shipped prior to the discovery of this error.

I hope this explanation is satisfactory.

Yours very truly,

S. C. Gitzen
