The September dust counts from the various floors of the dry mill are tabulated below. There was a sweeper working on the 5th floor during the sampling period. Also there were a few flexible rubber vent connections off some of the screens on the 5th, 4th and half deck floors.

The temperature was 60°F, wind was 1-2 mph from the S. W. and the barometer read 30.45 during the sampling period.

	Dust Counts (mppcf)
Floor 6	11.9
Floor 5	13.0
Floor 4	8.5
Floor 3	11.3
Half Deck	22.0
Floor 2	10.9
Floor 1	4.3
