SUBJECT: Professor Bill Burgess - Harvard/NIOSH Environmental Study

TO: R. N. Miller

CC: V. Zeitz D. R. Petterson
R. Rolle G. Hildick-Smith

I spoke with Bill Burgess this morning to establish the status of his survey data. Bill agreed that he would send us the remaining raw data, such as air sampling immediately. He confirmed that the analysis and examination of all the samples have been completed, therefore a complete set of results can be made available to us. He further advised that the draft of their upcoming paper is due to be completed February 1st and a copy of this will be sent to us as soon as it has been completed. He proposed that we should meet with him in Boston on February 22nd to discuss the results of their survey and to receive our comments on his paper.
