ANNOUNCEMENT

The Chemical Group

J. S. (Jack) Mayausky, General Superintendent, Quality Assurance/Customer Service, at the Nitro Plant, has been selected as the new plant manager for the Anniston Plant, effective immediately. In following The Chemical Group's new process for selecting plant managers that involves plant input, his selection from a number of suitable candidates was strongly influenced by the consensus recommendations of two Anniston employee groups.

He replaces William L. DeFer whose new position with NutraSweet Company was announced previously.

After joining Monsanto at Pensacola in 1982 as a Senior Analytical Chemist in Fibers, Mr. Mayausky held various positions of increasing responsibility at Pensacola before being named to his current job in 1992. He received a B.S. degree in chemistry from the University of Pittsburgh in 1977 and a Ph.D. degree in analytical chemistry from Ohio State University in 1982.

Mr. Mayausky, his wife and two children will relocate to Anniston in the near future.
