Representatives of the Northwestern University Occupational Medicine staff will be in the plant on Thursday, December 12, to present to you the protocol and details of the proposed study of workers associated with chlorophenols and ag esters production. The meeting will be at 9:00 in the North Conference Room. Accompanying the Northwestern people will be members of our DMEH group and a physician-consultant of the ICWU.

A meeting will be scheduled for the afternoon of December 12 with the Local 12 Committeemen to present to them the same details of the study.

It has been suggested by Northwestern that participants in the study might bias the results if they were aware too far in advance that the study was going to take place. With this in mind, it would probably be prudent on our part if the Local 12 Committeemen did not know of these meetings until the appropriate time.
