Philip Carey -
Asbestos Paper and
Asbestos-cement board.

On April 6, 1967 Mr. John Hupperts, Sales Manager, Industrial Paper Products Division and O. P. Best, Sales Representative, The Philip Carey Manufacturing Company, called on us.

Mr. Hupperts indicated they should have no problem in developing an asbestos paper to meet our needs. The only problem was paper trim, as they have a 72" machine. Would you find out prices from him (I indicated $50.00/ton was way high) and send a sample of our 2118-1 for analysis. If they can meet our present price, I would like to work with them to give us another approved supplier.

The 1/4" asbestos board used by Fermica probably comes from Philip Carey. Additional samples of their Type "F" board, sanded two sides, were requested along with pricing and available widths.
