

November 2, 1944

Dr. Harold C. Hodges,
Strong Memorial Hospital,
University of Rochester,
Crittenden Station,
Rochester, New York.

Dear Dr. Hodges:

You will find attached to this letter a form letter such as has been addressed to various members of the American Industrial Hygiene Association, in an effort to obtain material for the planning of the program for the April meeting. According to present plans the program of A.I.H.A. will be presented on April 25 and 26. We shall probably have more offerings than can be accepted, but I am very anxious that this shall be a good program in 1945. For this reason we should make our plans early, and therefore I am asking a number of people to submit material for the program at the earliest possible time in order that we may have the major portion of the program fitted together well in advance of the dead line.

I should appreciate it very much if you would let me have any offerings from yourself and your associates. Moreover, if you have any other suggestions to offer in connection with the program, please be good enough to let me have them.

Cordially yours,

Robert A. Kehoe, M. D.
