Mr. Frank Amato
National Automotive Parts Association
2999 Circle 75 Parkway
Atlanta, GA 30339

Dear Frank:

Enclosed is the D.O.T. Hazardous Material form you sent Ron Bagley in November. One sheet was used to cover the various materials and products which we supply to NAPA and Rayloc.

Brake lining is not listed in the hazardous materials table (172.101). Two of the constituent materials of some of our formulas (asbestos and lead sulfide) do appear on the table, but both show "none" for labels required.

This leads us to conclude that the D.O.T. regulations do not require labels or any special packaging, and the form so indicates.

If you have any questions or want any additional information, please let me know.

Very truly yours,

Luke
