Company Pursuant to Order Dated October 20, 2003. Documents responsive to this Request have been produced in response to Request for Production No. 16 and potentially for one or more other Requests.

REQUEST NO. 18:

Any and all writings or documents of any nature whatsoever in the possession of this Defendant, any predecessor or related companies, which refer, reflect, concern or relate to in any way to the performance of dust respirators against fibrous dust.

RESPONSE:

Defendant has not identified any Warner Electric Brake & Clutch Company documents responsive to this request. Documents about respirators have been produced in response to Request for Production No. 5 and potentially one or more other Requests.

REQUEST NO. 19:

Any and all writings or documents of any nature whatsoever in the possession of this Defendant, any predecessor or related companies, which refer, reflect, concern or relate to in any way to any dust level counts, air sample reports or industrial hygiene surveys performed or conducted during the application, installation, or removal of any asbestos-containing and/or vermiculite-containing products.
