February 10, 1969

Dr. Otis Fancher
Industrial Bio-Test Laboratories, Inc.
1810 Frontage Road
Northbrook, Illinois 60062

Dear Otis:

Can you please send to me 25-50 gram samples of the toxaphene and DDT which are being used in the Aroclor study? Scott Tucker has requested these so that he can include them in his analytical work.

Best personal regards.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health

P.S. A Xerox of a letter from Industrial Bio-Test Laboratories to Bill Hunt indicates that the tissues from the 30-day rat study will be ready for mailing the week of March 10. I don't have any word on the status of the acute work with the chickens.
