Subject STEAM SUPERVISORS LETTER NO. 63-4

Index: Insulation, Crossover Pipe

Route: M.L. #S-8

The decision has been made to insulate crossover pipes in the field. The first order to be affected by this change will be Pacific Gas and Electric Co., 13-A-2668 & 2670. All subsequent orders, except foreign or export orders, will be handled in the same manner. Insulation procurement for foreign or export customer orders is to be handled as in the past; that is, directly through M.I. Production and the Purchasing Department. The material is to be shipped to the field with the turbines.

The procurement of crossover pipe insulation in the field will closely parallel the turbine insulation procurement procedure (H. Vaughan's letter dated 7/18/61). All blanket-type insulation will continue to be made in our shops at the Steam Divisions.
