Mr. M. J. Donnelly
Uniroyal Inc.
58 Maple Street
Naugatuck, Connecticut 06770

Dear Mr. Donnelly:

This is a follow-up letter to the one Mr. Danzer wrote you on April 26, 1972, concerning the conversion of your Therminol FR system.

We have received 2 drums of Therminol FR-1 from your company. I assume you do not have any additional Therminol FR fluids on hand. In the event you should locate any of these fluids, please contact us for their proper disposal.

We would appreciate your confirmation that your Therminol FR system has been drained, flushed and converted to a non-PCB fluid. We would also be interested in knowing the fluid used as the FR replacement.

The enclosed information will give you additional background on the PCB situation and help explain the necessity of avoiding further loss of these fluids to the environment.

We want you to be aware that some Federal and State agencies are sampling plant effluents and marine life looking for, among other things, PCB chemistry. If PCB is found, the agencies tend to determine the PCB source.

If there are any questions, please feel free to contact me at (314) 694-2514.

Sincerely,

Paul W. Gann
Project Coordinator
Heat Transfer Fluids
