Speaker's Response: Please give your impression of how the speech was received. What especially interesting or difficult questions did your audience ask? What was their reaction to the handout material? Please include any suggestions you may have for the improvement of our materials or procedures. Your comments are vital to the success of our program.

Question

In the new book "Who's Poisoning America" by Nader, Brownstein, and Richard (1981), the subject of PCB's is mentioned. In particular, in the last paragraph of page 178, specific allegations are made about PCB content in food (Mother's milk vs cow's milk). Could you give me Monsanto's position on this statement?

Please complete this form while your experience is fresh in your mind -- preferably within 24 hours after your appearance. Your feedback will play an essential role in our ongoing evaluation of the Speakers' Service.
