RE: CH2M Hill Report for EPRI and New Jersey Comments

Attached is the CH2M Hill report which EPRI commissioned to help with the New Jersey rulemaking. Lincoln, et al. approach the problem somewhat differently than does TERRA and they do not make the value judgments TERRA is willing to make. Some new data is used regarding ingestion, which TERRA also used and analyzed quite thoroughly.

I have incorporated some of the CH2M work into the comments, but would like your views on how we can best use the report. While the numbers derived are somewhat different (higher) than TERRA's ultimate results, I think the risk level analysis reflected in the CH2M piece is valuable. Let me know what you think. In any event, I will be talking with Abe Silvers at EPRI some time today about the report. (For example, I don't know at the moment whether this document can be considered a draft.)

If all goes well -- and, of course, it hardly ever does -- I will have the draft comments into Federal Express Tuesday evening, Wednesday night at the latest. They are due in New Jersey Wednesday, May 27, so they will have to go out Tuesday night.

Attention: Toni Allen

Subject: Assessment of DEPE's Proposed Soil Remediation Level

Abe Silvers at EPRI has requested that I forward copies of our report "An Analysis of the Effect of Uncertainty on Remediation Levels for PCBs" to you. Please call if you have questions.

Sincerely,

CH2M HILL

David Lincoln
