POLYCHLORINATED BIPHENYLS

NOTICE

WARNING -- This product contains polychlorinated biphenyls which some studies have shown may be persistent, an environmental contaminant and possibly injurious to certain forms of bird, aquatic and animal life.

Use of this product must be restricted to applications which can be controlled so that entry into the environment does not occur and for applications in which it cannot come into contact with food, animal feedstuffs or pharmaceuticals.

Extreme care should be taken to prevent any spills, leakage, disposal vaporization or otherwise. When such accidents occur, the product must be collected and not allowed to enter the environment.

entry into the environment through

Spoke to Bill Papageorge about what should be done if a leak or spill occured from a drum! Especially in remote areas, ex-US!

Suggested considering adding to domestic-export label

which has the 3¢/lb P for destruction!

" In case of leak or spill, contact your monsanto agent."

If we can't spell out all the options on a label, we might be able to instruct our agents so they can provide optimum help, to avoid careless exageration of the problem!
