GOVERNMENT OF WESTERN AUSTRALIA

MINES DEPARTMENT

Wittenoom, 22nd May '58. 19

To The Manager,

Australian Blue Asbestos Ltd.,

WITTENOOM.

Dear Sir,

I wish to record my appreciation of the manner in which the problem of dust control within the mill building has been undertaken.

From what at one appeared to be an impossible task your staff have now got the dust under control to the degree that the few points still emitting dust can be effectively sealed.

Mill conditions as seen yesterday by Inspector Hunt and myself were definitely the best experienced by us. With the completion of further modifications planned by the Mill Superintendent, the dust problem should become a thing of the past.

DISTRICT INSPECTOR OF MINES.CUE.
