In a recent staff meeting Earle Harbison raised the question, "Will the government let us go out of the PCB business?" In reviewing the prior contingency plans, I can't find where this question is answered. I think that we need to answer this for the long range plan.

JCW:smt

Tom - Could you give us an opinion on this? The point is related to product safety

1) Can we be forced to make the product?
2) If the govt can force us to stay in — under what circumstances?
