To Dr. C. B. Myers Address

From H. O. Bourque Address

Subject Asbestos Surveillance Date May 15, 1978

In reference to your letter of May 8, 1978, we have reviewed our files for all employees who are now working or have in the past worked as an insulator, carpenter or PVC mechanic. These are the crafts which normally worked insulation or materials containing asbestos.

As you know, we no longer use insulation containing asbestos. Transite and Haveg, which contain asbestos, are still in use. New procedures require that all cutting and machining of these materials be done in a special area in Central Shops, which has been equipped with a vacuum collection system.

Some problems were encountered after the installation of the system and a lathe was relocated. Emission tests were made after the change but the results have not been received. An opinion has been expressed that we are now in compliance.

I am sure you recognize that many other employees have, on occasion, been exposed to asbestos dust. It is practically impossible to identify these people or their exposure.

H. O. Bourque
