Portez un respirateur dans les endroits mal aérés.

When Installing New Bendix® Global Brake Pads:
Reduce the chance of brake failure and save on repair costs by regularly servicing the complete brake system.

Brake Parts:	**Service Required:**
Disc Pads	ALWAYS REPLACE Worn-out pads score rotor, cause noise and lead to unreliable stopping
Rotors	REPLACE or RESURFACE Worn rotors cause pulsating pedal, brake chatter and noise
Brake Calipers	REPLACE OR REBUILD Leaking or frozen calipers can ruin pads, causing unreliable stops and premature pad wear.
Brake Hardware	ALWAYS REPLACE Worn hardware can cause noise, premature pad wear and malfunctioning caliper.
Hoses and Steel Lines	INSPECT; REPLACE WHEN DAMAGED Leaks, cracks, kinks or blockage cause loss of hydraulic pressure in brake system.
Brake Fluid	INSPECT Fluid in master cylinder should be clean and clear. Fill with fluid recommended by vehicle manufacturer. Ensures proper hydraulic pressure in brake system.

CAUTION: Always service/replace all parts in axle sets for safety reasons.
PRECAUCION: Por razones de seguridad, siempre haga el servicio o reemplace todas las partes en juegos por eje.
ATTENTION: Toujours réparer/remplacer toutes le pièces des ensembles d'essieux par mesure de sécuité.
