Lung(s)
fibrous proteins of 211
mechanism studies 217
microstructure of 210
pulmonary mechanics 220
response to physical irritants 261

Magnetic fields
bibliography of biological effects 269

Margarine, so-called illness from 232

Nitrobenzene, evaluation of exposure to 254

Nitrous oxide and leukemia 244

Nose and phagocytosis 255

Ophthalmology
management of corneal lesions 216

Organic finishes, hazards in handling 289

Phagocytosis and the nose 255

Pneumoconiosis
in ball-clay industry 260
lymphatic dust transport 256
mineral content of lung 257
pulmonary alveolar mural sclerosis 228

Pressure, effects of high altitude 268

Pulmonary function measurements
on diatomite workers 259

Pulmonary mechanics
physical and biochemical factors 220

Radiation (ionizing, nuclear, x-rays, etc.)
carcinogenesis at different ages 273

Radioactive, stack gas beta monitor 280

Radioelements, radioisotopes
in animal foodstuff 277

Radium dial painting
osteogenic sarcoma 278

Radon, radiation dose from 279

Rehabilitation in disseminated sclerosis 212

Respiratory disease, pathology 217

Safety in industry
fundamentals of accident prevention 209
maintenance and safety 208

Sclerosis
disseminated rehabilitation 212

Silicosis
complement fixation in monkeys 263
effect of hydrocortisone 264
fibrogenicity of respirable dusts 262

Smoking
clinical and public health challenge 224

Space flight, physiological response 268

Stack gas beta monitor 280

Staphylococci infections
in rural patients 230

Tetanus
treatment in Deep South 226

Tetrachloroethane, a survey 252

Thallium poisoning
cutaneous histopathology 248

Thorotrast-induced meningioma 270

Tin
outbreak of foodborne illness from 249

Trauma
etiology of beat knee 214
of the hand 215

Trichloroethylene
fatal addiction to 253

Waste disposal
from pharmaceutical plant 297
petrochemical wastes 298
submerged combustion 299

X-ray(s)
early protection in the U.S. 271
exposure received by medical workers 272
intestinal stenosis after therapy 275
late damage to spinal cord 276
treatment of leukemia 274
