Dr. Robert A. Nehoe
Mettering Laboratory of Applied Physiology
University of Cincinnati College of Medicine
Cincinnati, Ohio

Dear Dr. Nehoe:

We are indeed grateful to you for your kind letter of May 29 and your generosity in offering the use of your tables and figures. Naturally, we are exceedingly anxious to have our text contain the latest data concerning lead absorption and excretion and therefore are more than eager to take advantage of your kind offer to send us your most recent information on this subject. We will hold off the construction of the Tables and Charts until your data arrive and will attempt to incorporate them in the final material. Be assured that due credit will be given you for this information and if your work had not been published by the time our book goes to press, a "personal communication" reference will be resorted to.

With all good wishes to you personally and with many thanks for your generosity in this matter, I am, believe me,

Sincerely yours,

Louis Goodman

Louis S. Goodman, M.D.
