PLAINTIFF'S EXHIBIT CEL-552

OSHA COMMITTEE MEETING NO. 2

The OSHA Committee met at 10:00 a. m. on August 26, 1976 in the South Conference Room for the purpose of reviewing the following item:

1. Monitoring the CCCTC work environment for air contaminants.

Dr. B. J. Bland reviewed the background data associated with environmental health activities of present and proposed OSHA/NIOSH standards. The Chemical Company's objective regarding the initial survey of air contaminants was also presented (ref. BJB-957-76 attached).

The Committee recommends that CCCTC immediately begin the initial survey for air contaminants (Phase I) in concurrence with the Chemical Company plan. The Committee felt that Analytical, Safety and Engineering could achieve this objective.
