AS DISCUSSED WITH DICK PODSIADLO OF YOUR MONTREAL OFFICE, I AM ENCLOSING 3 SLABS OF PVC COMPOUND WHICH WE INTEND TO USE IN AN AUTOMOTIVE APPLICATION. THIS APPLICATION IS FISHER BODY MATERIAL SPEC FBMS 2-8 TYPE III GRADE A. PLEASE COULD YOU TELL US IF ANY OR ALL OF THESE COMPOUNDS WILL PASS THE FOGGING TEST GM 9068-P (% REFLECTIVITY NOT LESS THAN 80% AND NO OILY DROPLETS WHEN TESTED AT 175°F)

THE COMPOUNDS ARE BASED ON THE FOLLOWING PLASTICIZER SYSTEMS

MH-678	MONOPLEX S-73 50 PHR	+ SANT 7-11 18 PHR
MH-679	SANT 7-11 28 PHR	+ DUP 42 PHR
MH-680	DIDP 71 PHR	

IF UNSATISFACTORY, COULD YOU RECOMMEND A PLASTICIZER SYSTEM.

DSW 587597

THANKING YOU FOR YOUR HELP, Martin Hofton

cc DICK PODSIADLO
