INTER OFFICE MEMORANDUM

05 December 1979

MEMO TO: A. H. Burney

FROM: Norman Renfro

SUBJECT: Industrial Hygiene: Asbestos Monitoring

In order to maintain compliance with the OSHA regulations, concerning asbestos exposure, Southwestern's insulators will need to be monitored. Please notify me whenever you suspect that our insulators may be exposed to asbestos. The testing will require that the insulator wear a personal monitor for an eight hour shift so please try and notify me at least one day in advance. Thanks for your cooperation.
