Dr. Edward J. Burger, Jr.
Executive Office of the President
Office of Science and Technology
Washington, D. C. 20506

Dear Dr. Burger:

Thank you very much for your letter of April 30, concerning our visit in the Office of Science and Technology on the previous day. I enjoyed very much meeting both you and the representatives of various government agencies. I know that such meetings will do much to solve the problems of mutual interest that confront both industry and government.

As promised, I am enclosing a later summary of the work on dogs using the three Aroclors. You have our permission to reproduce these for use by other government agencies. I wish, however, you would state that it is the opinion of our toxicological consultant that the peritonitis in the dogs fed Aroclor 1254 was due to pinworms, and they think a great deal of the weight loss is due to this infestation and not dose related.

Sincerely,

R. Emmet Kelly, M. D.
Medical Director
