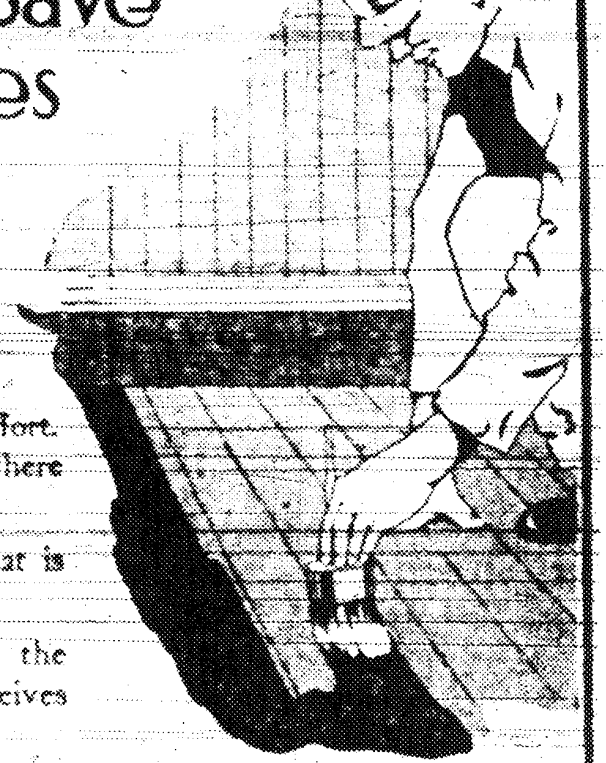
A Painted Floor Will Save A Thousand Strokes Of The Broom



Bare boards mean hard work with a scrubbing brush; they mean stains and an unsightly floor, too, and constant sweeping.

A painted floor means a clean floor with but little effort. Besides it means a sanitary floor with no open cracks where dust and germs can lodge.

Even thoughtful husbands need reminding, so that is why we are delivering this message on floor painting.

Make the housework easier for her by painting the kitchen, pantry, laundry and every floor surface that receives constant wear.

As in everything else, there is a BEST in paints and for your purpose it is

Hueter's Floor Paint

First of all, it dries HARD—will stand the scuff of shoes and the wear of grit.

It dries ELASTIC—it responds to the step—gives "life" to the floor—makes it easier for one to move about the room.

It dries QUICKLY—overnight—paint the floor tonight; you can walk on it tomorrow.

And it is made for the climatic conditions of the Pacific Coast, which play an important part in the wear of paint.

Paint the floors yourself if you can; otherwise employ a painter, but insist that he use Hueter's Floor Paint; then you will get the results. The paint comes in thirteen desirable shades. Ask for a color card.

We sell and recommend Hueter's Floor Paint because we believe it to be the best paint made.
