Mr. J. W. Durstine

PLAINTIFF'S
EXHIBIT
FD-520

Subject: Identification of Production Materials and Components Containing Chromium and Benzene

Reference: J. W. Durstine's letter of April 28, 1980 to D. D. Baker, et al, same subject

Because of the large number of specifications to be reviewed, Electrical and Electronics Product Engineering is unable to meet the timing requested by the referent letter. As previously agreed between J. B. Huebner, EED and L. T. Dixon, E & RS, we will furnish a list of production materials known or suspected to contain chromium or benzene by November 30, 1980.
