Let's discuss
JFG 6/19

Subject: INDUSTRIAL HYGIENE
MANUFACTURING PLANTS

I asked Mr. Fassuliotis to give me an updated report on industrial hygiene conditions at our Building, Chemical and Granule plants. His report is attached.

I strongly suggest that attention be devoted to these dust and noise conditions and that corrective action be taken as soon as possible, including installation of equipment and mechanical controls as needed and the strict enforcement of the wearing of protective devices, where necessary.

This is a matter of employee health as well as a matter concerning the quality of life on the job . . . . not to mention OSHA requirements.

Mr. Fassuliotis will be available to discuss this report with you and furnish whatever help he can to improve conditions.

J F Gow
