growing period has been developed by USDA soil scientists. The new product, a series of combinations of urea and formaldehyde, is called "uniform." Since both principal components are in short supply, commercial production will be small for a short time. Early reports from field and greenhouse have been very satisfactory.

Build up the minerals in your soils for orchards, vineyards, etc.

BEET SUGAR LIME
AGRICULTURAL MINERAL
FLUE DUST
(a calcium-potash material)

For more permanent soil fertility with greater crop yield apply these materials to restore soil minerals in a most effective and economical manner. The results last over a number of years.

Delivered in trucklots in bulk to your ranch.

Apply soon as crop is harvested.

are:

1. Mother Hen, a Beau Pere mare, who is a full sister to Grand Pere, a Hollywood Park $25,000 stake winner. She is from Brave Bird, now racing at Golden Gate Park, and has a filly foal by her side sired by Alibhai.

2. Flying Mary, a mare by Pompay out of Flora Mery by Sir Galahad.

3. Swinging By, sired by Caruso out of Flying Banner by Pennant. She has a stallion colt with her sired by imported Piping Rock, an English horse.

4. Sue Keystone, sired by Libyan Sands out of Laura by Sir Hugo and now is nursing a filly foal sired by Mastaff.

5. Bridal Gown, another Beau Pere mare in foal to Termination.

6. Miss Blackout, sired by Teddy Weed out of Sheltered Lady by

She is a sister of the dam of the famous On Trust, one of the best known horses now racing, who took third in the Kentucky Derby and second in the Preakness. She is not in foal.

Principal stars in the Edenvale show, however, are the young colts now in training. Right now their forefathers are being neglected until they have proved their worth, receive names to be registered with the Jockey Club and start out to prove their heritage.

Some are expected to appear in the lists when Santa Anita opens in December.

One of the most prominent of the most advanced yearlings being trained by Jack Williams is a Blue Larkspur colt bearing the name of Flaming Bush. His dam was Flam-

Market Milk Producers Production Cost Survey

Representatives of the County Farm Bureau Market Milk Producers last week began contacting dairymen on a cost of production survey through which they hope to adjust the price paid for Grade A milk.

The survey came as a result of a meeting two weeks ago when members of the organization quizzed W. E. Woodburn, chief of the State Bureau of Market Milk Enforcement seeking to secure a wider margin between costs and butterfat price.

At the time, local dairymen contended the butterfat price is based on costs of production figures compiled two years ago and asked that the district be resurveyed.

Complying, the State Bureau last week sent new forms to J. R. Bush of the group who now is contacting the 17 dairymen of the area whose books are used in determining the basic costs of production.

Dairymen on the survey list include N. M. Gomes, W. A. Benbow, John L. Bettencourt, Harry Longhoffer, J. A. Macimiento, Joe E. Mendes, Joe Amaral, Boesch Bros., Frank Hopkins and Son, Col. Roscoe, Correia Bros., Victor Coehlo, Jack Hamilton, Serpa Bros., John Resendes, Cardoza Bros., John Azevedo and William Katen.

Following the survey, the State Bureau's auditor will follow through to double check the books.

Dairymen have pointed out that costs have risen 20 per cent since the present figures were established, seek more margin between the $1.20½ per pound paid for butterfat and the $1.68 the State estimates it costs to produce each pound.

Pointing to the need for an adjustment, Frank Hopkins said last week that milk production figures here show that dairymen cannot compete with costs at the present price for their product.

Hopkins said that costs, coupled with new Grade A requirements and the necessity of building new barns, has caused consumer milk production to drop and manufacturer's milk to rise.
