MEMORANDUM TO ROBERT BEBER

cc: Alden Pierce
Larry Moss

FROM: P. A. Cera

SUBJ: Asbestos - Newark

*Call Cera - what type
of work is involved?*

This is to advise you of Ambrosia/Newark's intent to remove asbestos containing materials at our facility. This removal should conclude the asbestos abatement program that began in May 1990.

On December 6, Charles Moleski from Grace performed an in-depth audit of the Newark facility. He concluded that approximately 90% of the remaining asbestos was in poor condition, and recommended removal in the near future. Mr. Moleski also had extensive conversation with members of the QAR staff and was satisfied with their ability to perform a satisfactory removal.

Subject to your approval, removal is tentatively scheduled for December 29-30, 1990. We will continue to utilize the services of QAR for the actual removal and Chem Waste Management for disposal. All air quality will be performed in accordance with ATH approved methods.
