Mr. James Pyne
Remet Corporation
3261 North Harbor Avenue
Suite C
Fullerton, California 92632

Dear Mr. Pyne:

During the past several months Bob Bevacqua and Doug Hansen have discussed with you possible arrangements on Remet handling and reselling Santovac 1 and Santovac 2.

As you are well aware, these products contain polychlorinated biphenyls (PCBs) of various types. These products have increasingly come under investigation and, in some studies, have been found to be persistent, an environmental contaminant and possibly injurious to certain forms of bird, aquatic and animal life. Accordingly, they must be kept out of the food chain and their use and ultimate disposal must be closely controlled.

For these reasons, it is a firm management policy that there will be no distributors for Santovac 1 and Santovac 2 and that no repackaging will be allowed. We have determined our present customers' applications and disposal practices for the Santovac fluids and are supplying only those who can meet stringent requirements. Based upon these considerations we will not be able to supply you additional amounts of Santovac 1 or Santovac 2.

For proper disposal, used Santovac 1 and 2 should be returned to Monsanto Company, W. G. Krummrich Plant, Sauget, Illinois 62201, Attention: Supervisor Dept. 246. This service is performed at cost which is $0.03 per pound.

I am sorry that the proposed arrangements could not be worked out. Please contact Bob Bevacqua or myself if you have further questions.

Very truly yours,

R. E. Hatton
Technical Manager
Hydraulics and Lubricants

cc: D. R. Hansen - Monsanto Company
R. S. Bevacqua - Monsanto Company

Note to RSB: Please emphasize again to Jim Pyne that he should alert his customers to the use and disposal requirements as outlined in the letters to your customers I have already sent out. Thanks.
