SUBJECT CALSILITE - NO ASBESTOS

Mr. Henry advised by phone on June 9, 1971 that we should make the following material for application on 1000°F lines:

1. 30 lineal feet - 3" x 3" double layer. This can be 3" x 1" and 5" x 2" or any other convenient combination.

2. 30 lineal feet - 2" x 3" double layer. This can be 2" x 1" and 4" x 2" or any other convenient combination.

3. 30 lineal feet - 8" x 3½" double layer. This can be 8" x 1½" and 11" x 2" or any other convenient combination. This material will be used on an 855°F line.

The 30 lineal feet of each is also optional and can be slightly more or less. The material will have to be shipped to:

Avco Insulation
5131 Trenton Ave.
Tampa, FL

ATT: Ed. Swindle

This material should be made at the same time as the Styrothane order and the material covered in my letter to you dated May 27, 1971.

When will this material be scheduled? The sooner the better.

W. C. SCHWINGEN
