PLAINTIFF'S EXHIBIT
FD-1571

Subject: Asbestos Non-Production Materials Utilization Survey

Ref.: Mr. A. G. Folger's and Mr. P. F. Guy letter dated April 29, 1980, same subject.

In accordance with the referenced letter, we are returning survey forms completed by the following T & C Division Plants: Batavia, Canton, Livonia, Sterling and Van Dyke.

No report will be sent from the Fairfax Plant which is closed for the present.

The report from Sharonville is due the first week in June. The Puerto Rico and Indianapolis Plants are temporarily closed. These reports are expected to be forwarded to your office by June 23, 1980. Contact R. Hric at 525-3041 should any questions arise.

Van Dyke Plant

May 21, 1980

To: Mr. R. L. Smith

From: R. M. Dombrowski

Subject: Asbestos Utilization Survey

Attached is the Asbestos Non-Production Material Utilization Survey for the Van Dyke Plant. The information supplied is based on our best estimate of actual application of asbestos material.

Due to the lack of detailed information on actual material utilized during the initial construction of our facilities we can only assume that material containing asbestos or actual asbestos was utilized. The plant is specifying non-asbestos material for all replacements or repairs.

68-11-71005	12 x 16 Boiler Manhole Gaskets Style 659-R	Ankotallic
68-40-00010	Asbestos Gasket Material 1/16" thick x 40" wide	

2. Asbestos cloth gaskets used on boiler fire box and breeching. Six (6) each per boiler.

3. Asbestos board used in construction of cooling towers millwater, Powerhouse, and Administration Building.

4. Valve Packing: Anchor Packing Company #317 - Approximately 30 pounds on hand

   #1304 - Approximately 20 pounds on hand

5. Lagging and Pipe Insulation used on #6 oil system, and oil heater at storage tank.

6. Pipe insulation on water softners and feed water system.
   Note: Feed water heater is a new installation and has fiber glass insulation.

7. Administration Building's equipment room; pipe insulation, pump, and valve covering.

8. Indirect fired roof heaters: Combustion chamber door gaskets - 37 units
   Gasket 1" diameter x 60" long

8006 0580

PRODUCED BY FORD

9. Arc Chutes used in 3,000 amp. and 1,600 amp. breakers in substations.

10. Insulation on boiler drums.

11. Lagging and insulation on cooling water lines #1 and #2 main air compressors.

SUBJECT: ASBESTOS NON-PRODUCTION MATERIALS UTILIZATION SURVEY

In accordance with your letter dated May 5, 1980, we are returning herewith the subject Survey Form.

You will note that there are no usages of asbestos products indicated. No asbestos materials were found in the manufacturing and related operations, nor was any found in the materials utilized in the construction of the plant.

By copy of this letter, we are asking that both Safety and Purchasing advise this department if any asbestos materials are being purchased for use at the Batavia Plant.

Please advise if any additional information is required in this matter.
