Operation Report
Dept. A-246 - Pyranol
January - 1965

PRODUCTION SUMMARY

Scheduled - 794,388#
Actual - 794,388#

YIELDS

	Standard	Actual	Y.T.D.
% Theory on TCB -	99.0%	99.15%	99.15%
Yield on TTCB -	99.0%	97.46%	97.46%

SIGNIFICANT ITEMS THIS MONTH

Pyranol was produced as TCB was available.

If the present demand for these blends continue, an additional blend tank will be needed so that the TCB-Aroclor blends and A13B3B can be produced simultaneously. The supply of TCB increased near the end of the month, and during the same period the stock of A13B3B reached a low level. Since all of these blends are made in the same facilities, the production of A13B3B was reduced so that the TCB-Aroclor blends could be made.

PLANS FOR NEXT MONTH

We expect to receive part of our TCB requirements from a production run made by Findett Co. using Monsanto's technology.

PRODUCT - Pyranol	1st of Mo.	Last of Mo.
Whse. Stock -	136,390#	53,570#
Dept. Stock -	0	104,400#
Total -	136,390#	157,970#
