Bill, the attached memo from Bill Papageorge indicates that Dr. John L. Hesse of the Water Resources Commission Dept. of Natural Resources, State of Michigan has contacted several of your customers.

Bill now suggests that Marketing discuss with our customers that Dr. Hesse was favorably impressed with the reception he received in working with them and was happy about the clean up activities which took place. We should then attempt to get more information on how the State of Michigan approached our customers, what demands were made, and whether or not these demands were practical and reasonable. The purpose of these discussions is to attempt to get information which we may want to pass on to other customers in the area.

Bill, I believe you call on most of these customers routinely, and I would appreciate your bringing up this subject on your next call. Thank you.

Regards,

George
